

## 35,000 Safety & Relief Valves Ready to Ship

When the pressure is on, trust North American Safety Valve Industries

### **We're Always on Standby**

When you're under pressure, NASVI's ready to help.

### **New & Remanufactured Safety Valves**

Extensive stock of new valves from trusted, top manufacturers and dependable remanufactured valves back by a 2-year warranty.

### 🕉 Same or Next-Day Shipping

Avoid or minimize downtime with NASVI's same or next-day shipping.

### **State-of-the-Art Repair & Setting Centers**

Nearly every safety valve's specifications are at our technicians' fingertips for exact work. Generally, irreparable valves can be replaced from our in-stock inventory.

### **½** Turnaround Exchange Program

Receive the valves needed for installation prior to shutting down, then ship us the old valves for repair or exchange.

### **Get an Instant Ouote**

spec sheet

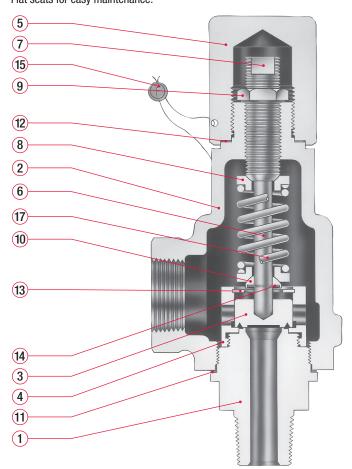

# Farris Series 1890

**Pressure Relief Valves** 

**ASME Section VIII for Air, Steam, Vapor & Liquid Service** 

### **Applications include:**

Set pressures to 800 psig. Stainless steel body and trim. Carbon steel bonnet and cap. Flat seats for easy maintenance.

### General Notes:

- 1. For high temperature range (+401°F to 750°F / +205°C to +399°C) change fourth digit of type number from "0" to "2". Example: 18902-M20 becomes 18922-M20. Spring changes to Chrome Alloy, Rust Proofed.
- 2. Type numbers shown designate valves with plain screwed caps. Test lever required for air, steam or hot water service (above 140°F / 60°C). For packed lever change the three digit type number suffix from "-M20" to "-M40". Example: 18902-M20 becomes 18902-M40.

|                        | mm | 203                                 | 43      | 67    | 1.6                          |  |

#### General Notes:

- 1. Capacities at 30 psig and below are based on 3 psi overpressure.
- 2. To determine water capacity at 25% overpressure, multiply the capacity at 10% by 1.066.
- 3. For sizing purposes, the coefficient of discharge  $K_d$  is 0.779 for air, gas, steam and vapor.
- 4. For liquid service, use the ASME liquid equation with a coefficient of discharge K<sub>d</sub> equal to 0.529.
